TABLE OF CONTENTS

Volume 21

Vol. 21 No. 1 1991

Commentary 1

CHRISTOPHER CHYBA and CARL SAGAN / Electrical Energy Sources for Organic Synthesis on the Early Earth 3

JOHN F. KERRIDGE / A Note on the Prebiotic Synthesis of Organic Acids in Carbonaceous Meteorities 19

M.P. KOLESNIKOV / Proteinoid Microspheres and the Process of Prebiological Photophosphorylation 31

RAFAEL NAVARRO-GONZÁLEZ, SUSANA CASTILLO-ROJAS, and ALICIA NEGRÓN-MENDOZA / Experimental and Computational Study of the Radiation-Induced Decomposition of Formaldehyde. Implications to Cometary Nuclei 39

Book Reviews

Rolf Jeßberger, *Kreationismus, Kritik des modernen Antievolutionismus* (GERDA HORNECK) 51

M.A. Geyh and H. Schleicher, *Absolute Age Determination, Physical and Chemical Dating Methods and Their Application* (DONALD S. MILLER) 52

Meeting Announcements 55

Vol. 21 No. 2 1991

Commentary 57

WILLIAM A. BONNER / The Origin and Amplification of Biomolecular Chirality 59

Vol. 21 No. 3 1991

O. TAKAOKA, Y. YAMAGATA and K. INOMATA / Diketopiperazine-Mediated Peptide Formation in Aqueous Solution. II. Catalytic Effect of Phosphate 113

TARAS YU GROMOVOY, VLADIMIR A. BASIUK and ALEXEI A. CHUIKO / Growth of Peptide Chains on Silica in Absence of Amino Acid Access from Without 119

Origins of Life and Evolution of the Biosphere **21**: 437–439, 1992.

VLADIMIR A. BASIUK, TARAS YU GROMOVOY, ALEXANDR M. GLUKHOY and VITALY G. GOLOVATY / Chemical Transformations of Proteinogenic Amino Acids during Their Sublimation in the Presence of Silica 129

CARLOS WONG, J. CARLOS SANTIAGO, LORENA RODRIGUEZ-PAEZ, MIGUEL IBÁNEZ, ISABEL BAEZA and J. ORÓ / Synthesis of Putrescine under Possible Primitive Earth Conditions 145

C. P. McKAY and H. HARTMAN / Hydrogen Peroxide and the Evolution of Oxygenic Photosynthesis 157

J. TZE-FEI WONG / Origin of Genetically Encoded Protein Synthesis: A Model based on Selection for RNA Peptidation 165

KLAUS DOSE, ANGELIKA BIEGER-DOSE, OLIVER KERZ and MARKUS GILL / DNA-Strand Breaks Limit Survival in Extreme Dryness 177

DAVID H. SCOTT, JAMES W. RICE, JR. and JAMES M. DOHM / Martian Paleolakes and Waterways: Exobiological Implications 189

Vol. 21 No. 4 1991

ANASTASSI KANAVARIOTI, MORGAN T. ROSENBACH, and T. BRIAN HURLEY / Nucleotides as Nucleophiles: Reactions of Nucleotides with Phosphoimidazolide Activated Guanosine 199

THOMAS G. WADDELL and TOD J. MILLER / Chemical Evolution of the Citric Acid Cycle: Sunlight Photolysis of the Amino Acids Glutamate and Aspartate 219

ISABEL BAEZA, MIGUEL IBÁÑEZ, CARLOS WONG, PEDRO CHÁVEZ, PATRICIO GARIGLIO, and J. ORÓ / Possible Prebiotic Significance of Polyamines in the Condensation, Protection, Encapsulation, and Biological Properties of DNA 225

EIICHI IMAI, JUN SHIRASAWA, HAJIME HONDA, and KOICHIRO MATSUNO / Contribution of Temperature Gradient to Aggregation of Thermal Heterocopolymers of Amino Acids in Aqueous Milieu 243

ENRIQUE MERINO, PAULINA BALBÁS, and FRANCISCO BOLIVAR / New Insights on the Comma-Less Theory 251

HAROLD P. KLEIN / The Viking Biology Experiments: Epilogue and Prologue 255

Book Review

Stephen F. Mason, *Chemical Evolution: Origins of the Elements, Molecules, and Living Systems* (ARTHUR WEBER) 263

Vol. 21 Nos. 5–6 1991

Special Issue:

Comets and the Origin and Evolution of Life

Guest Editor: Paul J. Thomas

COMMENTARY / Comets and the Origins and Evolution of Life 265

J. ORÓ, T. MILLS, and A. LAZCANO / Comets and the Formation of Biochemical Compounds on the Primitive Earth – A Review 267

A.H. DELSEMME / Cometary Origin of Carbon, Nitrogen and Water on the Earth 279

W.F. HUEBNER and D.C. BOICE / Comets as a Possible Source of Prebiotic Molecules 299

VERNE R. OBERBECK and HANS AGGARWAL / Comet Impacts and Chemical Evolution on the Bombarded Earth 317

DUNCAN STEEL / Cometary Supply of Terrestrial Organics: Lessons from the K/T and the Present Epoch 339

RAFAEL NAVARRO-GONZÁLEZ, CYRIL PONNAMPERUMA and RAJ K. KHANNA / Computational Study of Radiation Chemical Processing in Comet Nuclei 359

MICHAEL R. WING and JEFFREY L. BADA / The Origin of the Polycyclic Aromatic Hydrocarbons in Meteorites 375

TRACY N. TINGLE, JAMES A. TYBURCZY, THOMAS J. AHRENS, and CHRISTOPHER H. BECKER / The Fate of Organic Matter During Planetary Accretion: Preliminary Studies of the Organic Chemistry of Experimentally Shocked Murchison Meteorite 385

R.D. BROWN, D.M. CRAGG, P.D. GODFREY, W.M. IRVINE, D. McGONAGLE and M. OHISHI / Recent Observations of Interstellar Molecules: Detection of CCO and a Limit on H_2C_3O 399

WILLIAM A. BONNER / Terrestrial and Extraterrestrial Sources of Molecular Homochirality 407

CLIFFORD N. MATTHEWS / Dark Matter in the Solar System: Hydrogen Cyanide Polymers 421
